

Essex Music Service — DJ Workshop (example course notes)

CCDesigner prototype overview — original outlines for demo planning only. Not a paid publisher pack. Logos and product names do not imply endorsement.

Purpose

CCDesigner prototype course notes for the EMS DJ Workshop mock product page. Inspired by the public Curriculum Enhancement workshops listing on essexmusicservice.org.uk. Not official EMS tutor packs.

Workshop snapshot (public listing)

DJ Workshops — tutors introduce and support students in DJ and music production, tailored to the school. Suitable for EYFS–KS3 & SEND (brochure / live music pages). Assemblies, half-day and full-day options. Public price: £250 per day (curriculum enhancement workshops page).

Learning outcomes (prototype)

Pupils explore DJ equipment and production ideas, creating a short collaborative mix that shows pulse awareness, turn-taking and a clear musical shape.

Success criteria

- Handle equipment carefully and take turns
- Keep a steady pulse when cueing or looping
- Mini mix has a clear start, middle and end
- Name one control used (crossfader / EQ / cue)

Suggested day shape (showcase lesson ~75 min core + rotations)

1. Deck tour & safety (15) — studio rules, controls map, demo mix (intro / drop / outro).
2. Beat matching basics (20) — rotate driver / navigator / feedback; clean crossfades.
3. Build a mini mix (25) — plan structure; 45–60 second sketch; optional EQ/filter colour.
4. Share and reflect (15) — perform; peer feedback; exit ticket; booking next step.

Station rota tip

Keep groups of 3–4. Cap volume. Celebrate careful listening over flashy moves.

Differentiation

Support: paired roles, visual step cards, pre-set loops.

Challenge: longer mix, two-track blend, MC spoken intro.

SEND: quieter station; listening-only vocabulary pathway.

Vocabulary

Deck · crossfader · cue · EQ · beat matching · loop · drop · mix · pulse · groove
